OBJECTIVE

High-achieving Information Technology student (CGPA: 9.26) seeking a Developer role. Skilled in building scalable end-to-end web applications integrating modern frontend interfaces with AI-powered backend services. Passionate about developing data-driven solutions to solve real-world organizational challenges.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, Responsive Design, Glassmorphism UI
- **Backend & AI:** Python, Hugging Face, Transformers, NLP, Web Scraping (BeautifulSoup , Selenium)
- **Data & Analytics:** Power BI (DAX), HR Analytics, Data Visualization
- **IoT:** IoT Architecture, IoT-Cloud Integration
- **Tools & Technologies:** Git, GitHub, VS Code, DOM Manipulation, Sliding-Window Architecture
- **Soft Skills:** Critical Thinking, Decision-Making, Leadership, Strategic Communication

PROJECTS

AI News Summarizer (AI Integration)

- Developed a Python-based real-time news aggregation and summarization system
- Engineered sliding-window architecture to process long articles efficiently
- Implemented advanced DOM scraping and heuristic filtering for clean AI-ready data

Interactive Portfolio Website (Frontend Development)

- Designed and developed a high-performance portfolio using modern UI principles
- Implemented Glassmorphism design and responsive cross-browser compatibility
- Optimized performance for fast loading and smooth user experience

HR Analytics Dashboard (Data Engineering & Visualization)

- interactive dashboards using Power BI and DAX for employee data analysis
- Enabled insights on workforce metrics such as diversity, performance, and headcount
- Created dynamic filtering and intuitive visual reporting systems
